ER30001 "1968 INTERVIEW NUMBER"

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

ER32006 "WHETHER SAMPLE OR NONSAMPLE"**Whether Individual Is Sample**

This variable not only indicates persons who were sample members but also flags nonsample members who were designated as followable. Thus far in PSID history, two such nonsample groups exist: nonsample elderly individuals, followed from 1990 through 1995, and nonsample parents of sample children if the children were under age 18, followed from 1994 through 2003.

Initially, the nonsample elderly have person numbers of 170 and higher and were aged 64 or older at the time of the 1989 interview and expected to be at least age 65 by the time of the 1990 interview. In each subsequent wave through 1995, a nonsample individual who was expected to be at least 65 years old by the time of the next interview was added to the group. Refer to Section I, Part 1, of the Guides to the 1990 and subsequent codebooks for further details.

Nonsample parents also have person numbers of 170 or greater. Initially, all such parents were designated in advance of the 1994 interview if any of their sample children were under age 18. These parents were followed until the youngest sample child reached age 25. As births of new sample members occurred from 1994 through 2003, their nonsample parent was made followable.

Beginning in 1994, children who were born since the initial interview for the sample to which they belonged and who carried the "PSID gene", that is, who had at least one sample parent but who did not move into a responding PSID family at birth, were designated moved-in sample members. Such children were assigned person numbers of 170 and higher but have individual weights for years when they are present in the PSID and otherwise fall under all PSID rules for sample members.

Some individuals whose cohort years are 1968, 1997 or 1999 and whose family met similar eligibility criteria to the immigrant refresher sample added in 2017/2019 became sample themselves as of 2019. Those individuals have a value of 4 on this variable.
